

ABSTRACT

Nowadays, there are online car reservations which give much benefit to user.

A rental service is a service in which customers arrive to request the hire of a rental unit.

It is more convenient than carrying the cost of owning and maintaining the unit.

A car rental or car hire agency is a company that rents automobiles for short period of time for a fee whether in a few hours or a few days or week.

It is an extended form of a rental shop, often organized with numerous local branches (which allow a user to return a vehicle to a different location), and primarily 'located near airports or busy city areas and often complemented by a website allowing online reservations.

Car rental agencies primarily serve people who have a car that is temporarily out Of reach or out of service, for example travelers who are out of town or owners of damaged or destroyed vehicles who are awaiting repair or insurance compensation.

Because of the variety of sizes of their vehicles, car rental agencies may also serve the self-moving industry needs, by renting vans or trucks, and in certain markets other types of vehicles such as motorcycles or scooters may also be offered.

In short, It is a system design specially for large, premium and small car rental business. The car rental system provides complete functionality of listing and booking car.

ACKNOWLEDGMENT

The satisfaction and euphoria that accompany the successful completion of any task would be incomplete without the mention of the people who made it possible, whose constant guidance and encouragement crowned our effort with success.

I express my sincere gratitude to our Principal **Dr.Manjunatha T S**, Jain Institute of Technology for providing facilities.

I wish to place on record my grateful thanks to **Dr.Rakesh L**, Head, Department of Computer Science and Engineering, Jain Institute of Technology, Davangere for providing encouragement and guidance.

We hereby like to thank **Mr.Parvathraj K M M**, Asst.,prof,Dept of CSE,on his periodic inspection, time-to-time evaluation of the project and help to bring the project to the present form.

Also we thank the faculty members of the **Computer Science and Engineering** department whose suggestions enabled us to surpass many of the seemingly impossible hurdles.

We also thank our guides and lastly we thank everybody who has directly or indirectly helped us in the course of this project.
